技术规格

Background:	This is the catalytic component of the active enzyme, which catalyzes the hydrolysis of ATP coupled with the exchange of sodium and potassium ions across the plasma membrane. This action creates the electrochemical gradient of sodium and potassium ions, providing the energy for active transport of various nutrients.
Applications:	WB, IF
Name of antibody:	Atp1a1(Ab-23)
Immunogen:	Synthesized non-phosphopeptide derived from human ATP 1 α 1/ Na^+ / K^+ ATPase1 around the phosphorylation site of serine 23 (K-K-S(p)-K-K).
Full name:	ATPase, $Na^+/K^+ transporting, alpha 1 polypeptide$
Synonyms :	Nkaa1b

SwissProt:	P06685
WB Predicted band size:	113 kDa
WB Positive control:	HeLa cells lysate
WB Recommended dilution:	500-3000
IF positive control:	HeLa cells
IF Recommend dilution:	100-500
