### 技术规格

<b>Background:</b>	This gene encodes a DNA damage response protein. The encoded protein may play a role in G2/M checkpoint arrest via maintenance of inhibitory phosphorylation of cyclin-dependent kinase 1. Mutations in this gene have been associated with primary autosomal recessive microcephaly 1 and premature chromosome condensation syndrome. Alternatively spliced transcript variants have been described.
<b>Applications:</b>	WB, IHC
<b>Name of antibody:</b>	MCPH1
<b>Immunogen:</b>	Synthesized peptide derived from internal of human MCPH1.
