## 兔抗 NELFA 多克隆抗体

- 中文名称: 兔抗 NELFA 多克隆抗体
- 英文名称: Anti-NELFA rabbit polyclonal antibody
- 别 名: WHSC2; NELF-A; P/OKcl.15
- 相关类别: 一抗
- 储 存: 冷冻 (-20℃)
- 宿 主: Rabbit
- 抗 原: NELFA
- 反应种属: Human, Mouse
- 标记物: Unconjugate
- 克隆类型: rabbit polyclonal

## 技术规格

fetal than in adult tissues. It encodes a protein shari 3% sequence identity with the mouse protein. Wolf- hhorn syndrome (WHS) is a malformation syndrome ciated with a hemizygous deletion of the distal shor of chromosome 4. This gene is mapped to the 165 HS critical region, and may play a role in the phence of the WHS or Pitt-Rogers-Danks syndrome. The enco protein is found to be capable of reacting with HLA estricted and tumor-specific cytotoxic T lymphocytes gesting a target for use in specific immunotherapy f large number of cancer patients. This protein has als en shown to be a member of the NELF (negative el ion factor) protein complex that participates in the r	Hirsc asso t arm kb W type coded -A2-r sug or a so be congat
--	--

	tion of RNA polymerase II transcription elongation.
Applications:	elisa, wb, ihc
Name of antibody:	NELFA
Immunogen:	Fusion protein of human NELFA
Full name:	negative elongation factor complex member A
Synonyms:	WHSC2; NELF-A; P/OKcl.15
SwissProt:	Q9H3P2
ELISA Recommended dilution:	5000-10000
IHC positive control:	Human thyroid cancer and human esophagus cancer
IHC Recommend dilution:	25-100
WB Predicted band size:	57 kDa
WB Positive control:	NIH/3T3 , RAW264.7 and Hela cell lysates
WB Recommended dilution:	200-1000
