

## 兔抗 CYP26B1 多克隆抗体

- 中文名称: 兔抗 CYP26B1 多克隆抗体
- 英文名称: Anti-CYP26B1 rabbit polyclonal antibody
- 别 名: cytochrome P450 family 26 subfamily B member 1 RHFCA; CYP26A2; P450RAI2; P450RAI-2
- 储 存: 冷冻(-20℃)
- 抗 原: CYP26B1
- 宿 主: Rabbit
- 反应种属: Human, Mouse, Rat
- 相关类别: 一抗
- 标记物: Unconjugate
- 克隆类型: rabbit polyclonal

## 技术规格

Background:	This gene encodes a member of the cytochrome P450 s uperfamily. The cytochrome P450 proteins are monooxyg enases which catalyze many reactions involved in drug metabolism and synthesis of cholesterol, steroids and ot her lipids. The encoded protein is localized to the endop lasmic reticulum, and functions as a critical regulator of all-trans retinoic acid levels by the specific inactivation o f all-trans retinoic acid to hydroxylated forms. Mutations in this gene are associated with radiohumeral fusions an d other skeletal and craniofacial anomalies, and increase d levels of the encoded protein are associated with athe rosclerotic lesions. Alternative splicing results in multiple transcript variants.

Applications:	ELISA, IHC
Name of antibody:	CYP26B1
Immunogen:	Fusion protein of human CYP26B1
Full name:	cytochrome P450 family 26 subfamily B member 1
Synonyms:	RHFCA; CYP26A2; P450RAI2; P450RAI-2
SwissProt:	Q9NR63
ELISA Recommended dilution:	5000-10000
IHC positive control:	Human brain
IHC Recommend dilution:	20-100
