技术规格

Background:	This gene encodes an integral membrane protein of small synaptic vesicles in brain and endocrine cells. The protein also binds cholesterol and is thought to direct targeting of vesicle-associated membrane protein 2 (synaptobrevin) to intracellular compartments. Mutations in this gene are associated with X-linked mental retardation (XL MR).
Applications:	WB, IHC
Name of antibody:	SYP
Immunogen:	Synthesized peptide derived from human Synaptophysin.
Full name:	synaptophysin
